APPLICATION: TEST FIRST

1. Repair all cracks and repoint joints. Dirt and loose particles should be removed from the surface to be treated.
2. The surface to be treated must be dry. SEAL - 5 may be applied with brush, roller or spray. Coat surface uniformly, leaving no pinholes or gaps, as rate shown on the coverage table shown below. Under normal conditions, surface will dry in 30 minutes.
3. When spraying apply fine mist coat first to break surface tension. Go over with coarse second coat thoroughly saturating masonry. Using brush or roller two coats are recommended.
